True Color. True Quality. True Value.

The TrueVIS SG series offers integrated printing and contour cutting at an unbeatable price. With stunning color quality and media versatility, they're machines you can build a business on.

Advanced Printing, Unbeatable Price

Specially Designed FlexFire Printheads
Print beautifully accurate color with two print heads that fire precision droplets in 3 sizes with a wide print coverage.

High Quality TrueVIS INK
Lower your operating costs while providing outstanding color output with Greenguard Gold Certified inks (CMYK) in convenient 500ml pouches, with reusable cartridge trays.

Integrated Printing and Contour Cutting
Work with more media and increase profits with a redesigned cut carriage and blade holder that offers increased down force and higher accuracy.

Build Your Business
Whether you're just starting out or expanding production, the SG delivers the value you need to quickly and easily build your business. Print and automatically contour cut dynamic decals, signs and vehicle graphics, plus brilliant banners, amazing apparel and more.

A Durable Device for Reliable Production
To optimize cutting accuracy and machine durability, the SG has a rigid, industrial design with improved motor and drive systems to minimize vibration. In addition, a newly designed grit roller reduces media skewing.

New Roland VersaWorks Dual RIP Software Included
VersaWorks Dual offers all the advanced and user-friendly features of VersaWorks but utilizes both PDF and PostScript engines to give users superfast preview times and improved file handling — including more accurate processing of files with transparencies.

Put More Life in Your Prints

TrueVIS Color, achieved through the precision combination of Roland DG's FlexFire printheads and TrueVIS INK, results in amazingly vibrant colors and stunning details that blow the competition away.
